Silestone®

by Cosentino®

The ultimate mineral HybriQ surface

Silestone® is a hybrid surface of minerals and recycled materials to dress up interior spaces with colour and textures.

→ Kitchen countertop of Silestone Ethereal Glow
The Silestone Ethereal series designs have been registered by Cosentino S.A.U.

Advantages

The advantages of Silestone® are numerous; it requires low maintenance, has a high resistance to stains and scratches and a very low absorption index. This, together with its minimal joints, makes Silestone® the ideal solution for work surfaces.

Silestone® is manufactured in more than 70 colours, three textures and various formats, making it highly versatile. The colour range goes from neutral tones and marbled structures, inspired by natural stones, to vibrant hues and bold structures, which goes beyond the natural world.

Applications

Silestone features extreme durability in the kitchen, bathroom and other indoor spaces exposed to constant activity and use.

Finishes

With the aim of being adapted to all styles, Silestone offers three different finishes - Polished, Suede and Volcano. Adding texture across kitchen countertops, flooring and cladding sets them apart and creates huge possibilities for different results.

★ → Polished

● → Suede

◆ → Volcano

→ Kitchen countertop and cladding of Silestone Cala Blue.
The Silestone Sunlit Days series designs have been registered by Cosentino S.A.U.

Sizes

Silestone® is available in Standard and Jumbo * size slabs, in addition to the standard formats recommended for flooring listed below:

Large format:

Jumbo slabs → Up to 327 x 159 cm
Standard slabs → Up to 306 x 140 cm

Tiles:

→ 30 x 30 cm → 60 x 30 cm
→ 40 x 40 cm → 60 x 40 cm
→ 60 x 60 cm → Cut to size

Silestone® is commercialised in 1.2, 2 and 3 cm thicknesses. In addition, different pieces can be combined to simulate thicker edges

*Jumbo slabs:

This size allows the creation of large surfaces with minimum joints. It allows versatility in design and greater hygiene. In this way the use of the slab is optimised and waste is reduced.

Warranty

The properties of Silestone are the result of constant years of innovation that guarantee maximum hygiene and safety.

The Ultimate mineral HybriQ® surface

Introducing Silestone® with the new HybriQ+ technology®

HybriQ® is a patented technology owned by Cosentino for the manufacture of Silestone®.

An innovative generation of advanced surfaces composed of a hybrid formulation: a new high-performance blend of Premium minerals, quartz and recycled materials produced through a sustainable manufacturing process, fully powered by recycled water and renewable energy. The result is a more beautiful and sustainable product that maintains Silestone's guaranteed quality.

100% recycled water

100% renewable electric energy

0% water spill

Minimum 20% of recycled glass

→ DNV accreditation. This prestigious external international laboratory certifies that all the statements we make about the sustainability and performance of Silestone with HybriQ and HybriQ+ are true and have been verified.

Discover more
on YouTube

→ Kitchen countertop and cladding of Silestone® Arcilla Red with HybriQ+ technology®.

More innovation

Cosentino's commitment to offering the most innovative and sustainable surfaces leads Silestone to exceptional performance and amazing depth of colour. Silestone is the meeting between innovation and sustainability.

More design

The new mineral composition makes possible greater depth in the colour, textures and tones of Silestone to create unique and customised interior spaces.

Same benefits

Silestone with HybriQ+ maintains all the characteristics of quality, durability and warranty that have made Silestone the market reference in its category.

More sustainable

HybriQ+ uses a minimum of 20% recycled materials, 98% recycled water and 100% renewable energy.

Dekton®

by Cosentino®

Innovation applied
to design

Dekton® has all the technical specifications required in a high resistance surface to transform any interior and exterior design project.

Advantages

Wide range of colours

High resistance to hydrolysis

Fireproof material

Scratch resistant

Abrasion resistant

Stain resistant

High mechanical strength

Dimensional stability

High resistant to UV rays

Heat resistant

Resistant to freezing and thawing

Easy to clean and low maintenance

→ Flooring in Dekton CP07 Ceppo and Furniture in Dekton VK01 Nebbia

Sizes

Dekton offers a wide variety of slab formats and customised cut-to-size, along with thicknesses of 0.4; 0.8; 1.2; 2 and 3 cm. This responds to the functional and creative needs of the designer in any interior and exterior project, however complex it may be.

Large format slab:

→ From 320 x 144 cm. Our standard format ranges from 320 x 144 cm as a nominal minimum size to a maximum size of 330 x 150 cm in colours with QuickCut technology.
→ 300 x 100 cm. New format in 8 mm for a selection of colours.
→ From 330 x 163 cm. Our ultra large format will be available during 2023 in a selection of colours.

Standard pieces ready to install:

→ 260 x 100 cm in 4 mm thickness. Optimma tile format
→ Formats with maximum use starting from a standard slab.
Some examples:

→ 142 x 106 cm → 142 x 71 cm → 159 x 142 cm → 71 x 71 cm
→ 142 x 142 cm → 142 x 79 cm → 159 x 71 cm

→ Customisation of the format according to project needs.

→ Cladding made of Dekton Opera

Applications

Kitchen countertops

Bathroom vanities

Outdoor countertops

Outdoor terrace wall coverings

Exterior walls and facades

Bathroom walls

Indoor floors

Bathroom and pool floor covering

Outdoor terrace floor covering

Stairs

Textures

Dekton is available in different textures so that the only limit is the imagination of the architect or designer: from the ultragloss finish, to options in matte or with a velvety texture.

* → X-Gloss

□ → Matte

◎ → Velvet

₩ → Textured Matte

Warranty

Dekton presents its 25 year warranty; a guarantee to give more confidence to the consumer with the most innovative material on the market.

Sensa®

by Cosentino®

Protected surface of natural stone

Sensa by Cosentino is the premium maintenance-free natural stone offered by Cosentino, a world leader in the natural stone industry. Its high quality and reliable performance provide a certified 15-year warranty.

Applications

Enjoy the design, hardness and resistance of natural stone without fear of staining. Sensa by Cosentino quartzites and granites have a revolutionary anti-stain treatment that protects them throughout the life of your countertop.

Textures

The colours and textures of Sensa by Cosentino have the calm and whimsical design of nature. Each of the shades available has a texture that produces different effects and sensations: Suede, Polished or Caresse.

Sensa by Cosentino® treatment

Cosentino subjects granite and quartzite to an invisible, longlasting treatment capable of chemically integrating into the material and allowing it to breathe. This technology increases its powerful natural properties and prolongs its life. The process alters the surface tension of the stone, thus causing the material itself to prevent liquids such as water, coffee or oil from penetrating.

Advantages

Unique designs

Minimal maintenance

Withstands high temperatures

High resistance to stains

Thanks to the natural characteristics of the material. Sensa is able to keep its colour unaltered and protect itself from alterations caused by sunlight and UV radiation.
